SAFETY PROCEDURE FOR CHARGING FORKLIFT BATTERIES

1. Proceed forward with the forklift, placing the mast with the nails touching the floor, then apply the parking brake.

2. Disconnect the forklift battery with both hands on the gray connector.

3. Insert the connector of the charger to the connector of the forklift battery, raise the switch and verify that the charger is working.

4. The approximate charging time is 6 to 8 hours. After loading the battery, it is necessary to allow this amount of time for a full charge.

TO DISCONNECT THE BATTERY:
1. The operator presses the button
2. Disconnect the cables between the charger and the battery.
3. Connect to the forklift cable
4. Lower the switch
